SUMMARY

SDE-1 (Android) with 3+ years of experience building and maintaining secure, scalable, production-grade mobile applications using Kotlin and Jetpack Compose. Currently working in fintech on RapiPay's NYE Android application, with hands-on experience in modular architecture, MVVM/MVI, REST and GraphQL integrations, Hilt, Coroutines, R8 optimization, application security, accessibility, and Android platform migrations. Experienced in delivering wallet, KYC, BBPS, merchant, onboarding, and transaction-related features in cross-functional teams.

TECHNICAL SKILLS: Android Development, Android SDK, Kotlin, Jetpack Compose, MVVM, MVI, Multi-Module Architecture, Kotlin Coroutines, Flow, Hilt/Dagger, REST APIs, Retrofit, GraphQL, Apollo, Room Database, DataStore, Gradle, R8/ProGuard, Dependency Injection, XML, Accessibility/TalkBack, WCAG, Debugging, Performance Optimization, Git, Jira.

PROFESSIONAL EXPERIENCE

RAPIPAY FINTECH PVT. LTD. NOIDA, UP / INDIA DEC 2025 - Present

SDE-1 (Android)

Working on NYE, RapiPay's consumer fintech Android application, developing and maintaining secure, scalable features across wallet/PPI, KYC onboarding, BBPS, merchant services, transaction flows, and shared platform components.

- Develop and maintain production Android features using Kotlin, Jetpack Compose, MVVM/MVI, Coroutines, Hilt, REST APIs, GraphQL/Apollo, and DataStore in a multi-module architecture.
- **Owned the Android integration of the EPA Employee-Assisted Full-KYC SDK journey** for NYE Wallet, covering multi-stage onboarding, KYC validation and fallback flows, CAF/OTP processing, journey resumption, and wallet activation integration.
- Implemented fintech workflows including wallet onboarding, CUG eligibility-based feature access, consent management, transaction status handling, and API-driven feature controls.
- **Implemented R8 Full Mode and release-build optimization**, including AGP/Kotlin/Gradle migration, ProGuard/R8 fixes, and resource optimization; reduced the APK from **44.4 MB to 44.1 MB** and achieved approximately **282.9 KB of DEX executable savings**.
- Diagnosed and resolved release-specific SDK and dependency-injection issues, including the Lending SDK Hilt ClassCastException under R8 Full Mode, and validated successful UAT release execution.
- Contributed to Android 16 / SDK 36 compatibility, edge-to-edge and system inset handling, dependency upgrades, large-screen/foldable support, and deprecated API migrations.
- Improved accessibility toward WCAG 2.2 AA and worked on VAPT remediation/application hardening, including TalkBack semantics, focus handling, root/instrumentation detection, anti-hooking measures, debugger detection, and SSL-pinning-related improvements.

Codenia Technologies LLP NOIDA, UP / INDIA NOV 2024 - DEC 2025

Mobile App Developer

Developed and maintained mobile apps for clients using Kotlin and Jetpack Compose. Interacted directly with clients to gather requirements, provide demonstrations, and plan development cycles. Implemented new features, optimized UI components, updated project builds, and handled live production projects including performance enhancements and UI redesigns. Gained working experience with Xcode for interface handling, debugging, and platform compatibility.

GetSafeNow Android (Live) & iOS (Development Phase) - Mobile Apps

- Modified UI across platforms to meet client requirements and improve visual consistency.
- Implemented encrypted chat-related features, message pin/unpin functionality, and domain whitelisting.
- Redesigned the iOS app UI to address App Store design concerns; resolved Android multi-calling and critical production issues.

OZ-Chat Android (Development Phase) - Mobile App

- Updated the Room UI according to client specifications and integrated the Matrix SDK for secure, real-time communication.
- Upgraded app SDKs and dependencies to improve compatibility and performance.

AUDAX LABS NOIDA, UP / INDIA JULY 2023 - AUG 2024

Software Engineer Trainee

Resolved bugs and project tickets, migrated legacy XML UI to Jetpack Compose, and won the company's Idea-Thon for developing a custom voice assistant with a unique activation word.

Livewire and S2 Del Mar - Mobile Apps

- Implemented REST API-driven external URL navigation and centralized reusable UI styles and views.
- Migrated legacy XML UI to Jetpack Compose and resolved critical bugs affecting app stability.

Livewire Assist - Proof of Concept

- Developed a POC that scans bike DTC (Diagnostic Trouble Codes) symbols/codes and integrated AI-assisted analysis for diagnostics and troubleshooting.

LEADERSHIP EXPERIENCE

AUDAX LABS - Software Engineer Trainee

- Led a team to victory in an Idea-Thon focused on developing a custom voice assistant with a unique activation keyword.
- Coordinated team efforts and presented the project to clients and company directors.

EDUCATION & OTHER

GLA UNIVERSITY, MATHURA, UTTAR PRADESH MAY 2023

Bachelor of Technology (Computer Science and Engineering)

INTERNSHIP - NETCAMP SOLUTIONS PVT. LTD.

Completed a 3-month Android development internship and developed a multi-purpose Android application.

CERTIFICATES

Netcamp Certification in Android.
Microsoft Certified: Power BI Data Analyst Associate Certification.
